
Title: Why ? (creating a spell)

Author: Dorillion

In this book I have put down my thoughts of what all ingredients and the preparations of my masters spellcreation. The spell was intended to release N..... from his prison in the statue in rivendell. This is only what I think is the use. As my master has much greater knowledge in this matters I cant be sure. And since I couldnt gather all information about the collection of ingredients and many preparations was kept a secret this book cant be used to create the spell.

The ore from around the statue and from fire island were used to create the special ore that we put in the grounds around the statue. The magic pickaxe probably was used to get the ore mixed properly. The ore my master created were of same alloy as the statue were buildt of. And the reason we put it in the ground around the statue was so the soul of N.....could spread out from the statue it self. The creatures that was infested wasnt important more than to know the grounds

around the statue
were infested. The
fertile dirt, magic
water and magic meat
is all ingredients to
recreate the body of
N..... Magic pithfork
and magic cleaver
were tools to handle
these body
ingredients. And the
expeditions to study
gargoyles is for me a
mystery, and I didnt
attend that expedition.

The expedition to
Terathan keep to
study the ancient
runes I did attend and
I dont know what my
master did find out
there. But he found
what he looked for in
the room where
Balrons have their
residens, that points to
that the runes he
found said something
about N..... life
maybe.

And finally we have
the Rotgut booze we
delivered to the town
of Rivendell.
The booze was of my
masters creation so I
believe that it contains
some of the alloy and
other ingredients.
And its purpose is to
make sure that N.....
have an easy way to
find a soul to takeover.
I know that this isnt
very detailed and that
is because my
understanding of
these matters is not in
any way compared
what my master
knows. But I know
that I will in the
future get more
knowledge in these
kind of matters.
And when I do I will
write another more
detailed book about the

matter of releasing
N.....
